How We Do It - Menard

Blue Moon Valley is a small village. Li Sun lives there with her grandmother. She is very happy in Blue Moon Valley. But there is a problem. Li Sun's grandmother is very old and very ill. She cannot work any more and has no money. One bright April morning she says to Li Sun, "Sit down, granddaughter. I have something to tell you."

## Funding

Funding became available from the second semester of the library, once it had been established that it was a worthy program. We have been very lucky as Tokai has been allowing us 500,000 yen per year for some years now. With this funding, we can purchase books, shopping carts, stationery, etc… There is also separate funding available for the graded readers in the main library on campus, funding which is also managed by the Graded Readers Committee members.

Distribution Method

Our library is a "portable" library because we use a delivery system. At the beginning of each semester, teachers are asked to fill-out a request if they wish to use the graded readers. On this request, they are asked to provide the class level, the building number (Shonan is a big campus), the class period, and whether they intend on using the books once or twice a week. This is to allow us to use the books most effectively.

In order to accommodate everybody and avoid having books out of circulation for too long, we need to form teams. We now have 14 shopping carts and usually have between 20 and 30 teachers who use the readers in their classes. Shopping carts are divided amongst buildings, then class levels, and finally we team up the teachers whose schedules allow them to share a cart. There are usually a maximum of 6 to 8 class periods in a single cart. Sometimes only one teacher uses a shopping cart, sometimes, up to 6 teachers share a cart.

How We Do It - Menard

Each teacher is then given a schedule, so they know who their cart mates are and where the cart is at any time. Teachers need to know where to get the cart from and who to pass it to. In some buildings, the carts are kept in the part-time teachers' lounge, but in other buildings, the carts are kept in full-time teachers' offices.

At the beginning of the semester, the Graded Readers Committee members fill each cart with the appropriate range of levels for the classes it will be brought to. We use to ask the teachers to do it themselves, but found that if we provide the carts already loaded, teachers start using the readers much earlier in the semester, which in turn benefits the students. Of course, at any time during the semester, the teachers can go to the locked room or to teachers' offices and return levels that students don't read anymore or supplement with extra levels or copies.

The borrowing and returning of books is done during class time, but the reading is done outside classroom hours.

A few years ago, the main library on campus agreed to house the Graded Readers in their own special section and shelf them by level, using the same color codes as the Foreign Language Center. Every year, the books most often borrowed from the main library are Graded Readers. This is partially due to 2 main reasons: first, students who got hooked on reading and want to continue reading even though the semester is over or their new teacher isn't bringing the graded readers to class and second, teachers who think the graded readers are great, but do not want to deal with the extra work, thus send their students to the main library. Either way, the students are reading.

Bringing the books to class and play librarian might seem like a lot of extra effort, but it's definitely worth it. Because we bring the books to class, the students have easy access to them; easy access translates into more reading. Returning and borrowing books in class also provides a chance for students to informally exchange opinions on books, as well as create a little bit of healthy competition.

Keeping track

This is where we need a scanner. From the beginning, we opted to spend the funds on books rather than on a scanner system. Now that the library is huge and popular and that students are allowed to borrow up to 4 books each class, I wish we had a scanner. The card at the back of the book requires more work, takes longer, and cards get lost. Every semester, we end up with cards with missing books, books with missing cards, or missing books and no card to show for them.

For the time being, we have to keep track of who has which book using the library cards. On each card, the students write their name, student number and date and give their teacher the card. When they return the books, the teacher signs the card and returns it to the book. I usually put all the cards on tables/desks at the front of the class, with the students' names facing up, and ask the students to place their books under the correct card by matching the title. This makes it a lot easier for me to keep track. I collect the books with their card on top, rubber band them together, then collect all the remaining cards and rubber band them as well. I usually do this while the students are selecting their new books.

I usually keep my cards in two piles, one for the books that were just borrowed that day and one for books that were borrowed before that day. Each pile is held together with a rubber band and both are placed into a plastic bag to avoid losing any cards. Keeping the piles separated helps me see if a student has had a book for "too long", which might indicate that the book will go missing if I don't remind the student about it. The pile of cards from books borrowed before that day is usually much thinner than the pile of cards from books borrowed that day, so it's easy to check.

For now, using the cards is our only option, but it is still faster than any other method, excluding a scanner of course.

Evaluation Method

At Tokai, we strongly encourage the teachers to let their students read for the pleasure of reading, which means no tests will follow, no exercises, no book reports, etc… On the other hand, we do advise they set goals for their students, for example, how many books they should try to read during the semester.   We noticed that students whose teachers set goals read a lot more than students whose teachers' didn't.

Our evaluation method is based on a handout we created. Does it prove beyond reasonable doubt that the students really read the book? I can't say it does, though Japanese students are generally very honest. The form asks the students to fill out 1 line for each book they read. There are 10 lines on each form. The information they have to provide is: the date, the book title, the level color, a choice of 3 answers, one of which they have to circle (easy, a little difficult, very difficult), and the last part is where they are asked to write 1 sentence about their favorite part of the book. When the students are done reading 10 books, they turn in their form and get a new one. This is very effective to help them (and their teacher) keep track of how many books they read. Some teachers add categories to the form such as how long it took to finish the book or number of words.

These forms are the same ones used for our very popular Graded Readers Reading Contest. To enter the contest, all the students have to do is read 40 books or more. No number of words is required, no minimum level, just reading. All the students who enter the contest get a certificate of achievement and have a chance to win a prize during the awards ceremony. In our very first reading contest (fall 2008), we had 68 students who read 40 books or more. Last semester (spring 2009), we had 105. Before starting the contest, we had very few students who read anywhere near 40 books unless their teachers required it.

Other Faculty Involvement

We were very lucky that right from the start, teachers were interested in trying out extensive reading in their classes. The teacher who started it at Tokai, but has since left Tokai, was very enthusiastic about it and I think her enthusiasm spread right from the start. Over the years, the library grew and the number of teachers using it also grew. We now have full-time and part-time teachers, both Japanese and non-Japanese teachers using extensive reading. Many of those teachers are repeaters, but every year, we get new teachers who try it. This semester, for the first time, a teacher who wasn't using the readers came to me and told me his students had asked him to please bring the graded readers to class. It doesn't get any better than this.

Innovations in Extensive Reading
Fiction in Action: Whodunit
Daniel Stewart
Kaisei Academy

Editor's comments-

Readers of this article might notice that the publisher of the innovation I describe here has also sponsored the mail-out of this issue of ERJ. That sponsorship was arranged ten months in advance and did not influence my choice of which innovation to discuss in this issue. Please note I attempt to give an unbiased view of all innovations by pointing out both the strengths and weaknesses.

The Way it Has Been

Extensive Reading tends to be added on to English language study programmes wherever it will fit. It is rare that ER is at the core and the materials available reflect that. With the exception of the excellent *Cover to Cover* series Day wrote with Yamanaka, Harsch and Ono, there is little available in the way of a central textbook that promotes extensive reading.

What's new?

This is a textbook which has been written around two graded reader stories, which are included. *Whodunit* is released in two formats. You can buy a hardcopy version from your favourite bookstore, but there is also an electronic version you can download under a creative commons license. Basically a creative commons licence means instead of an author putting 'all rights reserved' on their book, they are putting 'some rights reserved'. You can learn more about creative commons licensing at creativecommons.org. The creative commons licence in this case means you can have all your students download a PDF file of the textbook and then pay whatever you feel it is worth. This is particularly useful in this case as the text includes two graded readers. You might want to use just one of the stories and you could then just pay for that one.

Besides the innovative distribution method, this textbook also has a very valuable basic concept -specializing in one genre. Students who use this text will become experts at the detective story genre. Students become familiar with the vocabulary and style of detective novels, so it will be very easy for them to pick up a detective story graded reader such as one of the many Sherlock Holmes stories offered by different publishers.

What is good about it?

The two stories are both well written and would have done well as stand-alone graded readers. The activities are well thought out, both to help clarify the story for weaker readers and to teach all readers about the detective genre.

The writers have also found a way to make the activities important to the reader. Near the end of each chapter a key sentence by one of the characters is blanked out. Students have to solve all the activities to find out what the character said. This is an effective way to encourage the students to do the activities.

Ellie stopped writing and looked up, confused. "Ms. Reed, if you have a key, why did you look for Lucia this morning? Why didn't you open the door yourself?"

Her cheeks blushing, Judith Reed answered…   155

5	8	18	16	13	6	10	20	2	13	6	9	19	1	17	19	20

5	6	12	3	7	11	18	19	4	5	12	8	5	6	1

4	15	9	2	7	6	13	20	10	15	14	2	12	8	17	9

"Did you tell this to anyone?" Ellie asked.

"No," muttered Judith. "I was too embarrassed. Besides, I thought I would find them eventually. But I've looked everywhere."

Ellie nodded and turned to Yokota. "I think it's time to meet the others."

Potential Weaknesses

  I see three issues that concern teachers considering using this textbook:

- cost
- level
- genre

Cost

  The store-bought version of this text is a little pricey. It costs about the same as buying three graded readers. Considering it contains two full graded readers, teachers will have to decide if having their students become experts in one genre is worth the extra cost. Fortunately, the electronic version is also available allowing teachers to pay whatever they feel it is worth. It is probably best to point out at this time that the hardcopy version also includes an audio CD and a detective notebook. The CD includes additional text for the stories which, while not crucial to the plotline, does enhance the story.

Level

  The stories are written at the 1,000-word level so about equivalent to an Oxford Stage 3 reader. As I see this text as a way to help students read detective story graded readers, I would have preferred to have the stories written at the 500 or 600 word level. 1,000 words might be too difficult for junior high school students, but should be fine for high school or university students. In addition, ABAX, the publisher, has plans for another lower level text in the near future.

Genre

  I teach at a junior and senior high school for boys and detective stories are definitely the most popular genre of graded readers. So I really appreciate any material that helps my students to be able to read detective stories. That being said, I am not sure that this genre would be as popular at all schools. Perhaps a different genre would be more popular at a school for girls. Fortunately the lower level text ABAX has planned will be a different genre.

Student Reaction

  I downloaded the PDF file from
http://abaxx.squarespace.com/catalogue/fiction-in-action-whodunit-creative-commons-edition.html
and had a few students try a few chapters. I was pleased to see the stories held their interest and they did all the activities before I could even ask them to do them. The missing sentence really does seem to be strong motivation to do the activities. Every student said they would like to finish the story.

Conclusion

  This is a really solid textbook with two innovative features: the creative commons licence and teaching students everything they need to know about one genre. The publisher is taking a big chance releasing the PDF of such an impressive textbook, but it is a great opportunity for teachers as we can just pay for what we use. I think this could be very useful when your school says you have to have a textbook for your extensive reading class. You could use the chapters from one of the two stories in this text and then have students do ER with detective novels for homework. Please make sure you do pay what you think this is worth so the publisher will be more inclined to release texts for other genres as well.
New Book Releases

Compiled by Bjorn Fuisting

Lots of news on the Graded Readers front: 200 new titles available! Cengage and Oxford University Press have new series out. Cengage's is a 12-level series edited by the known ER researcher Rob Waring called Page Turners. 50 more titles to come and they are looking for more writers.

Oxford are adding further levels to their Dolphin Readers with the new series Oxford Read and Discover, 4 levels of non-fiction readers with less of a jump in headwords between levels. They also have a new updated edition of their popular Dominos series.

And a royal award has been bestowed upon a Japan based Graded Readers author. Marcos Benevides and Adam Gray will receive the HRH The Duke of Edinburgh ESU English Language Book Award for 2010 for their book *"Whodunit"* (available for download through ABAX). Congratulations! Maybe you could be next?

Also might add that the 200 net titles are since the last ERJ issue.

1. Extensive reading in a challenging environment: a comparison of extensive and intensive reading approaches in Saudi Arabia

Faisal Al-Homoud & Norbert Schmitt

Many studies have shown that reading can have a beneficial effect on second language learning, but relatively few of these have focused on extensive reading in classroom environments over a period of time. This study compares an extensive reading class against a more traditional class involving intensive reading and vocabulary exercises. The classes were part of a Saudi college presessional course, and this classroom setting posed several problems for the extensive reading approach, including relatively weak students, an environment where pleasure reading is atypical, and the course being of short duration. The result is that the reported extensive reading class was carried out in what could be considered challenging conditions. Nevertheless, gain scores in reading comprehension ability, reading speed, and vocabulary acquisition showed that the extensive reading approach was just as effective as the intensive approach, even though some of the measurement instruments for these variables should have favored the intensive approach. Moreover, the extensive reading participants reported much more positive attitudes toward reading, their class, and their learning than the participants in the intensive reading group. Overall, these results indicate that, for the variables studied, the extensive reading approach was as good as, or better than, the more focused intensive reading approach.

2. Using Comprehensive Memory Cycle Updating in Extensive Reading

T.K. Chiu, T.I. Wang, J.H. Fu, T.C. Hsieh, C.Y. Su, K.H. Tsai,

English is a global language and thus learning it is important in many contexts. One way to approach this learning task is to undertake extensive reading of English texts. However, if students have an inadequate vocabulary, it is difficult for them to select appropriate articles to read. To address this problem, a number of studies have applied the theory of the memory cycle to help learners memorize words more efficiently. However, the method is inefficient when it just uses to update the memory cycle of the target words directly. In this work we propose a new framework, comprehensive memory cycle updating, which can not only update the memory cycle of the word directly, but also can update the memory cycle indirectly via learner response. This framework can reduce the number of times a learner needs to review a word in order to memorize it. In addition, by adopting the concept of the memory cycle, this framework can find articles, which contain words that the learners have already learned, as well as those they have almost forgotten.

3. Extensive reading through the Internet: is it worth the while?

Juan Pino Silva

Reading materials written in English is the prime goal of many reading programs around the world. Extensive reading (ER) has for years aided new students at my institution to gradually acquire large vocabularies and other sub-skills that are needed to read fluently. To continue to do that effectively, a new scheme involving the use of internet - called w-ERP- was set in place in collaboration with the students. The main focus of this article is to describe the 3-phase, gradual process that led to the current design of the web-based ER scheme. The paper begins with a brief discussion of ER, reading on line (RO) and self-directed learning as part of the rationale for the new scheme.

Participants? preliminary data on the benefits and potentials for learning to read and reading for learning other things are discussed.

4. Teacher modeling: Its impact on an extensive reading program

Jason Kok Khiang Loh

Reading in a Foreign Language October 2009, Volume 21, No. 2

This case study investigates whether teachers model reading in 1 Singapore primary school during an exercise called uninterrupted sustained silent reading (USSR) carried out in the classroom. Even though reading is an important determinant of a student's growth in language skills and ability, and modeling the act of reading is essential in influencing students, we hypothesize that teachers do not model the act of reading. This study seeks to find out if teachers practice what they preach about reading by making the effort to model the act of reading. This study uses an observation log, questionnaire surveys, and semi-structured interviews. Fifty teachers were observed during USSR daily for 10 weeks and surveyed. Purposeful and systematic samplings were used to identify the teachers for the interviews. The study confirms our hypothesis that even though the teachers believe in the importance of reading and modeling, they do not model reading.

5. Why and how textbooks should encourage extensive reading

Dale Brown

ELT J (2009) 63 (3): 238-245.

Extensive reading is believed to have considerable benefits for learners both in terms of learning gains and motivation and seems to be becoming ever more popular in the ELT world. So far, however, there seems to be almost no integration of extensive reading and textbooks.
This article argues that textbooks should be encouraging extensive reading, since this will confer further legitimacy on extensive reading and may ease many of the practical difficulties that adopters of extensive reading face. The article then shows how textbooks could encourage extensive reading: directly, by including material involving extensive reading; and indirectly, by approaching textbook reading activities in ways more in tune with extensive reading. A number of proposals for each of these approaches are discussed.

6. Extensive Reading Program Which Changes Reluctant Engineering Students into Autonomous Learners of English

Nishizawa, Hitoshi; Yoshioka, Takayoshi; Itoh, Kazuaki

This article introduces extensive reading (ER) as an approach to improve fundamental communication skills in English of reluctant EFL learners : average Japanese engineering students. It is distinct from concurrent translation approach from a perspective that the learners use English instead of Japanese to grasp the meaning of what they read and enjoy reading. In the ER program at Toyota National College of Technology, many students developed more positive attitude toward English, increased their reading speed, and achieved higher TOEIC scores, which was compared to those of the students before this ER program was introduced. Comparison between three groups of the students showed strong correlation between their TOEIC scores and the reading amount.

7. Investigating Teacher Attitudes to Extensive Reading Practices in Higher Education: Why Isn't Everyone Doing It?

John Macalister

RELC Journal April 2010 vol. 41 no. 1 59-75

This paper reports on interviews conducted with 36 teachers involved in university preparation courses at language teaching centres in New Zealand. The interviews were designed to investigate teacher attitudes to extensive

reading in higher educational contexts, and current practice in such contexts. While teachers expressed positive beliefs about the language learning benefits of extensive reading, these beliefs did not generally result in the inclusion of extensive reading in the classroom programme. This may reflect the realities of the wider educational context. If extensive reading is to be more widespread in higher educational contexts, it needs to be promoted through teacher education, new research, changes in course design, raising awareness among administrators and managers, and improved resource provision.

8. To Explore "One-stop" English Multimedia Networking Teaching Based on Google??A Case Study of English Extensive Reading

SUN Kun

Modern Educational Technology, 2010-04

The paper explores "one-stop" English multimedia networking teaching based on Google which is supported by Site as backboned, as well as main tools such as Doc, Notebook, Calendar etc. English Extensive Reading, as a case, is exemplified to display the steps of establishing "one-stop" teaching. Such "one-stop" teaching not only saves hardware consumption, but integrates multimedia teaching with net learning, which is able to form learning community based on web easily, so as to improve teaching effect significantly. Being user-friendly, such "one-stop" teaching based on Google, is expected to play an important role in future teaching.

9. Come to an Enjoyable Class: EFL Extensive Reading

Arwijati Wahjudi

TEFLIN Journal: *A publication on the teaching and learning of English*, Vol. 13, No 2 (2002)

This paper argues that an Extensive Reading Class is not a place for reading only, where students read and, therefore, may become better readers. In fact, lots of interaction among students, between student(s) and teacher, can happen, and this happens in an EFL natural situation. The students have something to talk about and are ready to share with the teacher and the other students what they have read. Questions asked are real questions, not comprehension or leading questions. Higher level questions, asking for opinions and feelings, are asked without the students being told to ask these kinds of questions. Students' opinions and feelings are expressed simply because they are necessary. Because of its potential as a place where students can exercise somewhat real language with little burden, if any, the writer suggests that Extensive Reading courses be offered at all levels in the English Department, starting from the first year.

10. The Language Learning Benefits of Extensive Reading: Teachers Should Be Good Role Models

Gopala Krishnan, Rozlan Abdul Rahim, Rasaya Marimuthu, Rahman Bin Abdullah, Faizah Mohamad, Kamaruzaman Jusoff

English Language Teaching, Vol 2, No 4 (2009)

Visioning a world class university is certainly an appropriate target for a university. Realizing this vision would need an expansion of knowledge and greater English proficiency as in this period of history, English is the language of IT which is an important key to acquiring knowledge. Using a sample of 40 level one students from UiTM Dungun this study found that in tandem with studies done elsewhere, extensive reading does seem to make a difference in the proficiency level of the students. Further the study also found that students who have a positive predisposition towards English read more and achieved better grades. However the study found no difference in the amount of reading done by boys and girls. The study discussed qualitatively the ability of teachers to inculcate the reading interest in the students, thus it is a triangular study which employs quantitative and qualitative means.

The Extensive Reading Foundation announces the **First Extensive Reading World Congress**, to be held on the campus of Kyoto Sangyo University, Kyoto, Japan from 3-6 September 2011. The World Congress represents the first time for all those involved with the extensive reading approach -- teachers, scholars, writers and publishers -- to gather under one roof for a conference dedicated purely to extensive reading.

Important Dates	
Opening of the proposal application process	1 September 2010
Start of pre-registration (Earlybird)	1 February 2011
Deadline for proposal submissions	28 February 2011
Announcement of proposal decisions	1 May 2011
Deadline for presenter confirmations	15 June 2011
Announcement of schedule (subject to change)	30 June 2011
Start of regular pre-registration	1 July 2011
Close of pre-registration	15 August 2011
JERA Workshop & ERF Pre-conference Workshops	3 September 2011 (Sat.)
Congress concurrent sessions - Day 1	4 September 2011 (Sun.)
Congress concurrent sessions - Day 2	5 September 2011 (Mon.)
Post-conference workshops	6 September 2011 (Tues.)
Deadline for Proceedings Submissions	31 October 2011
